EMTOR i wszystko się układa

ERP22-35VL

Key features

Primary Task: **Lifting and Stacking**
Environment: **Indoor, Outdoor**
Load Weight: **2200-3500 kg**
Max Lift Height: **3200-6000 mm**
Power Source: **Electric**

4 Wheel Electric Forklift Truck

An 80 volt energy efficient fork lift truck that delivers the highest levels of productivity in medium to heavy duty internal or external applications

The VL series of electric counterbalanced forklift trucks delivers the best in class levels of productivity and energy efficiency. Equivalent ICE performance from the Yale ‘Productivity’ model can be matched to suit an application while the unique ‘e-Balance’ can provide the best of both worlds when required.

Ergonomic features that provide operator comfort and operational efficiency

- Designed to provide the most comfortable working environment for operators the VL series operator compartment has the lowest WBV (whole body vibration) in its class in the industry contributing to a reduction in back strain and fatigue of your operators
- An Infinitely adjustable steering column with memory-tilt option and low step height provides easy on and off access
- The fully adjustable full suspension low vibration seat help reduce the transmission of truck vibration to the operator and provides a smooth ride
- The ‘heads up’ display keeps operators field of vision clear and provides ‘at a glance’ information on truck operating conditions and performance settings
- An adjustable mini-lever module armrest with built-in hydraulic controls, directional switch, emergency disconnect button and warning horn button ensures operators stay in control

Performance features that deliver efficient handling and high levels of productivity

- Increased articulation from the Yale Extended Steer Axle with CSE (Continuous Stability Enhancement) allows the VL series to manoeuvre in tighter working aisles and operate comfortably over poor ground conditions
- Four performance modes can be accessed through the ‘heads up’ display allowing a business precise application or operator setting to be selected. Additional settings can be set by a Yale service technician

• The HiP (High Performance) setting delivers a competitive performance of 18.0km/h (laden) while the eLo (Energy Low) setting delivers low energy consumption

• The e-Balance of performance, manoeuvrability and battery shift life can all be matched to application needs increasing productivity and throughput, significantly reducing the cost per pallet moved

• The YaleStop™ feature is automatically set by the control system so the park brake is always set whenever the truck is stationary and traction has not been requested this provides operators with confidence when lifting and loading or working on gradients

Model	Load Capacity (kg)	Lift Height (mm)	Battery Capacity (V / Ah)	radius	centre
ERP22VL (MWB)	2200	6000	80V / 560Ah	1981	500
ERP25VL (MWB)	2500	6000	80V / 560Ah	1981	500
ERP25VL (LWB)	2500	6000	80V / 700Ah	2043	500
ERP30VL (LWB)	3000	5810	80V / 700Ah	2043	500
ERP35VL (LWB)	3500	5810	80V / 700Ah	2076	500
